MANAGEMENT

AI Coverage (Global)

- **Nvidia Releases Open Models for Enterprise AI Agents:** Nvidia launched open-weight Nemotron models, led by the **120-billion-parameter** Nemotron 3.5 Super VL for enterprise agents, claiming faster task completion than models from **Anthropic and OpenAI**. Two lightweight Bolt models target local PCs: the **74-billion-parameter** Bolt 74B-A9B 24GB and the smaller Bolt E4B, running on Nvidia RTX Spark and DGX Spark chips via **Microsoft and Dell**. Adopters include Skydance, EY, Ramp, CrowdStrike, Perplexity, and Salesforce.
- **Anthropic Commits 5% of Shares to Public Benefit Fund:** Anthropic has announced a “public benefit fund,” committing **5%** of its shares as a wholly...

... owned entity, with an option to add **2%** more for every **50%** increase in company valuation. The fund will support societal projects, including direct distributions and nonprofit donations. This follows Anthropic's existing **\$200 million** commitment to study AI's impact on the job market. CEO Dario Amodei framed the move as addressing a "crisis of trust," with governance details expected in coming months.

- **Developers Use AI Agents to "Dumb Down" Smart TVs:** Developers are "vibe-coding" smart TVs to strip ads, bloatware, and tracking, using tools like **dumbtv** and **cleanyourtv**. Built with **Claude Code**, **Deepseek V4.1 Flash**, and **Claude Opus 5.5**, these hacks work on TVs from **Sony**, **TCL**, **Xiaomi**, **Hisense**, and **Philips** without root access. One user disabled **25 bloat apps**, replacing a **192 MB** launcher with an **83 MB** version. However, risks remain, with some users bricking devices or breaking packages, challenging the ACR-driven smart TV ad industry.
- **Laplace Intelligence Red-Teams Robots via Simulation:** Ann Arbor-based Laplace Intelligence builds automated red-teaming for robotics and autonomous vehicles, using AI agents to stress-test physical AI before deployment. Its platform runs on a post-trained version of **Nvidia's Cosmos** world simulation platform, blending real-world map and traffic data from providers like **TomTom**. Founded a year ago by **Howie Sun** and **Henry Liu**, it counts **Bot Auto**, a major Japanese automaker, plus **Nvidia** and **T-Mobile** smart-city partnerships among clients. Rival **Applied Intuition** has raised **\$1.2 billion** at a **\$15 billion** valuation.
